

VISEMI
FOUNDATION

About Us

Unlock the potential of Vietnam's semiconductor talent
and build a global network of experts and innovators.

01

Who We Are

Visemi Foundation, a U.S. 501(c)(3) non-profit based in Silicon Valley, connects Vietnamese talent with the semiconductor industry through education and mentorship. We aim to empower the Vietnamese community, drive innovation, and support Vietnam's role in the global semiconductor ecosystem.

02

Key Initiatives

- 01 Understanding the semiconductor ecosystem
- 02 Career orientation and development for students
- 03 Building a global network of experts and mentors
- 04 Supporting graduate study abroad through the Cất Cánh Fellowship

03

Why We Exist

As microchip demand surges, there is a shortage of skilled professionals due to a gap between industry needs and educational output. Visemi Foundation bridges this gap with training tailored to industry needs, preparing participants to excel in this critical sector.

FOUNDING TEAM

Minh Tran, Ph.D.
CO-FOUNDER & PRESIDENT
VP of Research
Nexus Photonics (USA)

Ha Nguyen
CO-FOUNDER & COO
Project Manager
Stanford Medicine (USA)

Cong Trinh, Ph.D.
CO-FOUNDER & CEO
Senior Manager
Applied Materials (USA)

Tan Trinh, Ph.D.
CO-FOUNDER & CTO
Senior Manager
Western Digital (USA)

Hung Tran, Ph.D.
CO-FOUNDER
Founder of Got It, Inc,
STEAM for Vietnam,
AI for Vietnam (USA)

Sonny Nguyen, M.Sc.
CO-FOUNDER
Senior Manager
Sandisk (USA)

Takeoff Fellowship

Lan Pham, MSc
Program Manager,
Master of Embedded Systems,
University of California, Irvine
(USA)

Linh Vu, MSc
Program Manager.
Master of Materials Science,
Stanford University
(USA)

35.5K Total Webinar Views

8K Followers on Social Media

8 Semiconductor Webinars Delivered

~50 Global Experts and Volunteers

10+ Vietnamese Universities Collaborated

~20 Students Supported to Grad Programs

DEMYSTIFYING SEMICONDUCTORS WEBINAR SERIES

Vietnam's first deep-dive semiconductor webinar series – entirely in Vietnamese. A 14-session curriculum on chip design, foundry, packaging, memory, photonics, and manufacturing. **1,800–4,000 live attendees per session.** Speakers from leading global semiconductor companies and academia across the U.S., EU, and Asia.

INDUSTRY EVENTS INVITED

Vietnam Tech Summit & Viet Career Conference 2025 (California, USA) • Opportunities and Challenges of the Microchip Design Profession – Hue University (Vietnam) • The International Conference & Job Fair on Microchip and Semiconductor 2025 – Saigon Hi-Tech Park (Vietnam) • SEMI EXPO 2025 (Hanoi, Vietnam)

NIC
VIETNAM NATIONAL INNOVATION CENTER

Cất Cánh (Takeoff) Fellowship Introduction

Founded by Dr. Loi Nguyen (Executive VP Emeritus, Marvell) & VISEMI Foundation

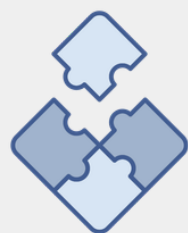

The Gaps

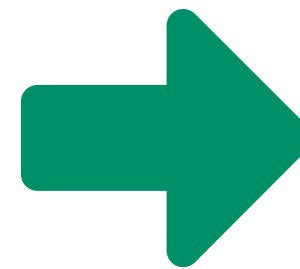

Global technical talent shortage in high-level semiconductors and advanced tech.

With **limited local MS and PhD opportunities**, fully funded programs in the USA, Taiwan, Korea, Japan, and the EU offer strong paths for talented STEM students.

Based on surveys and interviews, top STEM talent faces severe **financial, language, and strategic barriers** that limit access to overseas education.

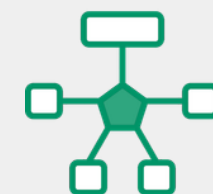

The Bridge

Delivers a structured **6-month accelerator** to help students successfully pursue fully funded graduate programs overseas.

Breaks down barriers via a **tiered financial support** and milestone-based financial funding.

Connects fellows with **VISEMI's network** of local ambassadors and tech leaders.

Builds a **alumni flywheel model** where every fellow commits to mentoring the next cohort.

Transformative Impact with Unmatched ROI

20

Fellows Funded (Year 1 Target)

- **193** applications received⁽¹⁾.
- **\$200K**⁽²⁾ fundraising target for grants & operations.

150

Fellows Funded (5-Year Goal)

- Escalate to a global Viet tech talent network with a budget **under \$2M**.

Takeoff Prep Grant⁽³⁾

~\$10,000

resolves existing roadblocks.

7x to 20x ROI

driven by the 6-month
accelerator program.

Fully-Funded Scholarship⁽⁴⁾

Average MS Program

\$70,000

Average PhD Program

\$200,000

(1) All applicants are invited to attend Takeoff workshops on scholarships, SOPs, or interviews, whether selected or not.

(2) More than 50% of the first-year funding target has been secured.

(3) An individual grant to bridge English language, research, admission fees.

(4) Total degree value, paid entirely by the destination host university or secured scholarship programs.

6-Month Accelerator Program (06/26 - 12/26)

Pillar 1: Intensive Preparation

Structured English training and strategic application coaching.

Pillar 2: Milestone Funding

Up to \$15K per student covering English learning, testing, conference, application, and basic needs.

Pillar 3: Global Mentorship

Pair with local ambassadors and worldwide experts for application coaching and long-term placement strategy.

Tiered Financial Support

Tier 1: Full Support Grant (Up to \$15K)

Full support for students with excellent academic records and documented financial hardship.

Tier 2: Application Grant (\$4K-\$5K)

Targeted funding for English and application gaps.

Tier 3 & 4: Mentorship Grant (~\$1K)

Strategic network access and early research exposure.
